

TERM 1	Week 1-2 27 January-5 February	Week 3 8-12 February	Week 4 15-19 February	Week 5 22-26 February	Week 6 1-5 March	Week 7 8-12 March	Week 8 15-19 March	Week 9-11 23March-31 March
CAPS Topics	Safety (Generic)		TERMINOLOGY Machining	Tools (Specific)	Consolidation of	of PAT and revision	Term Test	
Topics /Concepts, Skills and Values	HIV/AIDS Awareness Knowledge of basic First Aid measures Analyse the OHS Act and regulations where applicable to the following machines: Grinding machines (portable, bench and surface) Cutting (drilling machines, power saw, band saw) Shearing machines (manual and power driven) Press machines Joining (arc, gas) Handling and usage of gas cylinders	 Principle of simple the ratio of 45° an Use principles 3, 4 Standard cross ce Transference of fle Use of strip, flange steel templates. Use of coloured at The application of RO Calculations of: Rise Slope Pitch The layout of roof trusses Practical: Develop a roof truss using Pythagoras. CALCULATION OF CO Quantification from Compiling of cuttir 	templates: wood, cardboard, steel setting out of the right angle and the d 60° right angled triangles. It and 5 sortes and benchmarks for diagrams to templates and web templates for steel section and lettered holes, instructions and conformal of the given instructions and templates. It is a drawings and lattice beams to froof trusses and lattice beams wing templates. WING TERMS:					
Requisite pre-	HIV/Aids Awareness	Terminology content in	grade 10			Grade 10 tools		
Resources (other than textbook) to enhance learning	OHS act, Safety signs in workshop, First aid manuals & Tools & Equipment	Tools and equipment as	mentioned above. Calculator		Tools an	nd equipment mentione	ed above	
Informal Assessment: Remediation	Classwork/case studies/worksheets/homework/class tests (Theory and practical work)							

PAT Phase 1 = 50 Marks (Practical of Safety & Tools and equipment) The legislation governing workplaces in relation to COVID – 19 is the Occupational Health and Safety Act, Act 85 of 1993, as amended, read with the Hazardous Biological Agents Regulations. Section 8 (1) of the Occupational

SBA (Formal)

Health and Safety (OHS) Act, Act 85 of 1993,
Safe work practices are types of administrative controls that include procedures for safe and proper work used to reduce the duration, frequency, or intensity of exposure to a hazard. Examples of safe work practices for SARS-CoV-2 include. Requiring regular hand washing or using of alcohol-based hand rubs. Learners and teachers should always wash hands when they are visibly soiled and after removing any PPE. Keep safe distances and wear a mask at all times.

Assignment

See the document on the workshop safety measures

2021 Annual Teaching Plan: Term 2 Mechanical Technology: Welding and Metalwork Grade 11

TERM 2	Week 1-3 13 -30 April	Week 4 3-7 May	Week 5-7 10-28 May	Week 8 31 May-4June	Week 9-11 7- 25 June
CAPS Topics	FORCES (Specific)	MAINTENANCE (Specific)	JOINING METHODS	JOINING METHODS	Revision and Consolidation and Term Test
Topics /Concepts, Skills and Values	FORCES: Effects of forces, moments and torques on engineering components applying design principles. Forces found in engineering components. Determine graphically: SYSTEM OF FORCES (Bows notation) • Triangle of forces • Polygon of forces • Resultant and equilibrant PRACTICAL: Determine graphically the magnitude of forces found in engineering components using triangle of force, polygon of forces and resultant forces. Moments: Moments found in engineering components.(By calculation only): Law of moments: Sum of LHM=Sum of RHM A supported beam with TWO vertical point loads acting on the beam with two supports. The calculation of shear force and bending moment diagram and graphically illustrated. PRACTICAL: Do calculations on moments of force found in engineering components? STRESS AND STRAIN (Calculations of) • Stress and strain (Hooke's law) • Compressive/ tensile stresses • Young's modulus of elasticity (ignore factor of safety) • Determine change in length • Stress/stra2n diagram PRACTICAL: Do calculations on stress and strain as indicated	Identify causes of malfunction of lathes and milling machines. Lack of lubrication or incorrect lubrication Overloading Friction Balancing Practical: Analyse and predict the outcome of the lack of maintenance on equipment used in the workshop:	Identify the application and uses of the following processes: Gas welding MIG welding PRACTICAL: Apply the theoretical knowledge in performing welding processes to produce a project using oxy acetylene, and MIG/MAGS welding. Apply the welding process to CARBON STEEL: The heating and cooling cycle To control the hardness Pre heating and tempering The use and application of SPOT (Resistance) WELDING: Description of process Current Electrodes Time cycle Maintenance and care of electrodes tips	Identify defects in welds, the causes and remedies for: Blow holes Porosity Incomplete penetration Undercutting Weld crater Restarts Slag inclusion Cracks PRACTICAL: Identify defects from different welds, the causes and remedies.	Half-year examination
Requisite pre- knowledge	Grade 10 forces	Grade 10 maintenance	PRACTICAL: Produce a project using spot welding, taking in consideration the size of the plate thickness; size tips; and maintenance of tips.	Grade 10 welding theory	
Resources (other than textbook) to enhance learning	YouTube videos, force board. Forces training kits. White board/chalkboard. Calculators	Prescribed workshop machines and videos.	Gas , MIG Spot welding	Workpieces with different weld defects	
		Classwork/case studies/v	vorksheets/homework/class tests (Theory and practical w	ork)	

Term Test PAT Phase 2 (Practical of Safety & Tools and equipment)

The legislation governing workplaces in relation to COVID – 19 is the Occupational Health and Safety Act, Act 85 of 1993, as amended, read with the Hazardous Biological Agents Regulations. Section 8 (1) of the Occupational Health and Safety (OHS) Act, Act 85 of 1993,

Safe work practices are types of administrative controls that include procedures for safe and proper work used to reduce the duration, frequency, or intensity of exposure to a hazard. Examples of safe work practices for SARS-CoV-2 include. Requiring regular hand washing or using of alcohol-based hand rubs. Learners and teachers should always wash hands when they are visibly soiled and after removing any PPE. Keep safe distances and wear a mask at all times.

2021 Annual Teaching Plan: Term 3 Mechanical Technology: Welding and Metalwork Grade 11

TERM 3		Week 1-2 13-16 June	Week 3 19-23 June	Week 4-8 2August-3 September	Week 9-11 6-23 September
CAPS Topics		JOINING METHODS	MATERIALS (GENERIC)	TERMINOLOGY DEVELOPMENT (Specific)	Revision, Remediation, Consolidation of PAT & TEST.
Topics /Concepts, Skills and Values		 The changes in structure of carbon steel during heating cooling processes The iron carbon equilibrium diagram: The temperature range of 500-900°C Carbon content between 0% and 1.4% Description of the purpose and methods for the following: Annealing Normalizing Hardening Tempering Case hardening PRACTICAL: Apply knowledge of heat treatment in performing tempering process on a cutting tool. Apply knowledge of heat treatment in performing normalizing process on a tempered cutting tool. 	Function and operation of the following equipment used during the manufacturing of steel: Blast furnace – refining of iron ore Bessemer convertor Electric arc furnace Distinguish between the following properties of engineering materials: Hardness Plasticity Elasticity Ductility Malleability Brittleness Toughness	 Development of: Transformations between parallel horizontal planes: Square to square Square to round Cones on and off centres Oblique cones with top and base parallel to the horizontal plane Right cylindrical Y-connections PRACTICAL: Apply the knowledge gained on development to produce TWO transformations between parallel horizontal planes and a right cylindrical Y-connection. 	
Requisite pre-kno	wledge		Grade 10 Materials.	Grade 10 Development and templates	
Resources (other enhance learning	•		Various bolts and nuts. Thread gauges, thread charts. Etc.	Videos, materials on which to test the properties.	
	Informal Assessment: Remediation	Classwork/c			
Assessment	SBA (Formal)	The legislation governing workplaces in relation to Biological Agents Regul Safe work practices are types of administrative control to a hazard. Examples of safe work practices for Safe work practic			

2021 Annual Teaching Plan: Term 4 Mechanical Technology: Welding and Metalwork Grade 11

1	FERM 4	Week 1 5-8 October	Week 2 11-15 October	Week 3 18-23 October	Week 4 – 5 26 -30 October	Week 6 – 11 5 November -8 December	
CAI	PS Topics	TERMINOLOGY : Steel Sections (Specific)			Revision, Remediation	Completion of PAT Examination	
Topics /Concepts, Skills and Values Knowledge of steel sections such as: Angle sections Channel sections I-beam sections Identification of the profile of the sections Uses of different sections Joining of the different sections Practical: Identify different types of steel sections as used in steel structures around the school or nearby buildings			Term1 work Term2 work Term3 work Term4 work				
_	Requisite pre-knowledge Grade 10 Materials		Term 1-4				
	es (other than to enhance	Steel profile pieces from hardware or industry. Videos and	YouTube videos.		Previous question papers and notes		
Assessment	Informal Assessment: Remediation	Classwork/case studies/worksheets/homework	/class tests (Theory and p	oractical work)
