Dear Teacher

The National State of Disaster due to the Covid-19 pandemic has resulted in the disruption of Education in South Africa and the loss of valuable teaching time and disruption of the school calendar.

As a result of this, the DBE has created and released revised Annual Teaching Plans (ATPs) to assist schools and teachers in ensuring the 2021 school year is completed. The 2021 ATPs are based on the revised ATPs that were developed in 2020. It is important to note that fundamental and core topics are retained in the 2021 ATPs. Some of the strategies that have been used in the process of developing the 2021 DBE ATPs are:

- reduction of content covered in certain topics
- merging of topics
- deleting topics
- revising the assessment guidelines
- reduction in teaching time for certain topics
- resequencing of topics/concepts

At Pearson South Africa, we believe that education is the key to every individual’s success. To ensure that despite the challenges, teachers and learners can meet all the necessary learning outcomes for the year, we have created the Navigation Pack, a free resource to support teachers and learners during this challenging time.

The Navigation Pack aims to summarise and highlight the changes in the 2021 DBE ATP and provide teachers and learners with worksheets that focus on impacted topics in the curriculum.

Due to resequencing of topics, the order of topics in the textbook that is currently used in the classroom may not be aligned to the new sequence of topics in the ATP. The Navigation Pack has a set of assessments based on the Section 4 changes and the revised assessment guidelines.
Covid-19 safety guidelines for teachers and learners

Gatherings at school

Where schools are open for learning, it is up to management to take decisive action to ensure sites are not simultaneously used for other functions such as shelters or treatment units in order to reduce the risk.

Implement social distancing practices that may include:

- A staggered timetable, where teachers and learners do not arrive/leave at the same time for the beginning and end of the school day.
- Cancelling any community meetings/events such as assemblies, cake sales, market day, tuckshop, after-care classes, matric dance, Eisteddfod and other events.
- Cancelling any extra-mural activities such as ballet classes, swimming lessons, sport games, music class and other events that create a crowd gathering.
- Teaching and modeling creating space and avoiding unnecessary touching.
- Limiting movement and interaction between classes.
- Schools with an established feeding scheme plan are to ensure that hygiene and social distancing is always implemented. Teachers and staff members assisting with food distribution are to wear masks, sanitise prior to issuing food items and learners are to stand 1.5m apart in the queue.

Wear a mask at all times.

1. Restrooms/toilets

Hand washing

Washing hands with soap and water or using alcohol-based hand sanitisers is one of the most important ways to help everybody stay healthy at school. Critical to this is preparing and maintaining handwashing stations with soap and water at the toilet and in each classroom.

Teachers and learners should always wash their hands after:

- eating
- entering the classroom
- using the toilet
- blowing your nose or coughing
- touching tears, mucous, saliva, blood or sweat.
2. Premises and Classroom setting

When schools open, classroom settings should be altered in order to promote hygiene, safety and social distancing.

Changed classroom settings may include:

• Cleaning and disinfecting school buildings, classrooms and especially sanitation of facilities at least once a day, particularly surfaces that are touched by many people (railings, lunch tables, sports equipment, door and window handles, toys, teaching and learning tools etc.).
• Ensure the proper ventilation and fresh flow of air through classrooms.
• Providing learners with vital information about how to protect themselves by incorporating the importance of hygiene, handwashing and other measures of protecting themselves, into the lessons.
• Promoting best handwashing and hygiene practices and providing hygiene supplies.

• Prepare and maintain handwashing stations with soap and water, and if possible, place alcohol-based hand sanitisers in each classroom, at entrances and exits, and near lunchrooms and toilets.
• Ensure teachers and learners wear a mask at all times.

Social distancing

• Space the learners out in the classroom (or outdoors) – try to keep learners separated by a minimum of 1,5m.
• Create space for learners’ desks to be at least 1,5m apart
• Learners should not share cups, eating utensils, or food
• Do not let learners eat items that fall on the floor or chew on pencils or other objects
• Avoid close contact, like shaking hands, hugging or kissing
3. Social behaviour

It is extremely vital during a pandemic that focus is not only directed towards optimal physical health and hygiene but finding ways to facilitate mental health support.

- Encourage kindness towards each other and avoid any stereotyping when talking about the virus.
- Stay home if you have a temperature or are ill.
- Do not touch people who are ill, but be empathetic.

Wear a mask at all times.

How to use this Navigation Pack

Revised DBE Teaching Plan: Comprehensive summary of the CAPS topics according to the revised ATPs.

Topic: Finance

Content summary

- Hire Purchase (HP) deals are offered on most household goods. Goods bought are on hire until fully paid off. Simple interest rate is charged on HP deals.
- Interest is the fee paid for borrowing money or money added to the amount invested.
- Repo rate is the interest charged to banks for borrowing from the Reserve bank. This affects the interest rates for investments.
- Interest is calculated as either Simple interest or Compound interest
  - (Application of $A = P(1 + i \cdot n)$ or $A = P(1 + i)^n$)
  - [For interest calculations learners are not supposed to use formulae but rather use previous values to calculate interest.]
- Banks offer three types of accounts: accounts for daily transactions; investment accounts and loan accounts.
- Bank charges include all fees and charges for all transactions.
- Learners should familiarise themselves with bank statements i.e. do calculations involving debit, credit and balance of accounts.
- Inflation refers to the general increase or decrease in the purchasing power of money over a period of time, measured against a particular standard.
- SARS (South African Revenue Service) is responsible for the collection of taxes. These are the main sources of income for the government.
- Learners should be able to use SARS tables to do calculations involving income tax, rebates and medical aid contributions.
- Exchange rate is the price of one currency in terms of the other. The rates depend on the price of goods and services provided by the various countries. Learners should be able to convert from one currency to the other depending on the prevailing exchange rate.
Question 1

Sipho decides to buy a pair of sneakers online. The sneakers cost $178,57 in New York (USA) and the same pair of sneakers costs £156,49 in London (UK). The table below shows the exchange rate for the US dollar and the UK pound.

<table>
<thead>
<tr>
<th>Currency</th>
<th>Exchange Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>$1</td>
<td>ZAR 14,52</td>
</tr>
<tr>
<td>£1</td>
<td>ZAR 18,71</td>
</tr>
</tbody>
</table>

1.1 Determine the cost of the sneakers in both cities in ZAR and calculate how much Sipho would save if he buys the sneakers from the cheapest city. (6)

1.2 Sipho sees the same pair of sneakers advertised for R3 000 in the local newspaper. The price of the sneakers includes an inflation rate of 5,9%.

Determine the price of the sneakers before inflation. (3)

Question 2

Stan sees an advert for a television set. The cash price is R11 199,00 including 15% VAT. On hire purchase (HP) the monthly instalment is R526,19 for 24 months. The deposit is 10% of the cash price. Stan’s network provider charges him R2,75 per minute, or part thereof, during peak time and charges him R2,25 per minute, or part thereof, during off-peak time.

2.1 Determine the price of the television set, excluding VAT. (2)

2.2 Calculate the deposit amount. (2)

2.3 Calculate the total amount payable (including deposit) if he bought the television set on HP. (3)

2.4 Stan makes a call for 9 minutes and 20 seconds during peak time. Calculate the amount his service provider will charge him. (2)

2.5 Determine the length of a call (in minutes) if Stan was charged R18,00 during off-peak hours. (2)

Question 3

Dr James is a doctor aged 48 years. He contributes to a medical aid scheme and has two dependants. He earns a monthly taxable income of R26 700,00.

The 2018/2019 SARS tax table is shown.

3.1 Calculate Dr James’s annual taxable income. (2)

3.2 Determine Dr James’s monthly income tax. (8)

R310 per month for the taxpayer who paid the medical scheme contributions
R310 per month for the first dependant
R209 per month for each additional dependant(s)

**TOTAL: 30**
Topic: Data handling

Content summary

- Data collection starts with the development of questions in order to collect the data.
- Data collection involves observation, interviews and questionnaires.
- When data is collected, it needs to be classified and organised. Statistical data is classified as numerical or categorical. Categorical (qualitative) data includes examples such as gender, type of animals, favourite movies and brands of cellphones.
- Numerical (quantitative) data is broken down into discrete and continuous data.
- Discrete data is data which can take only integer values i.e., number of people, number of cars.
- Continuous data is usually associated with some kind of measurement i.e. height of trees, body temperature.
- Summarising data involves finding the mean, median, mode, quartiles and range.
- Learners should interpret and answer questions relating to growth charts and BMI age growth curves.
- Data representation is done through the use of: pie charts; bar graphs; histograms; line graphs; scatter plots and box-and-whisker plots.
- Learners are not necessarily expected to draw pie charts or box-and-whisker plots but to interpret them when answering related questions.
**Mathematical Literacy Grade 12**

**Targeted Worksheet 2**

**Topic: Data handling**

<table>
<thead>
<tr>
<th>Name:</th>
<th>Surname:</th>
</tr>
</thead>
</table>

**Question 1**

The Mathematical Literacy marks for Grades 12A, 12B and 12C learners are shown in the tables. The box-and-whisker plots showing the data are shown below the tables.

**Grade 12A**

<table>
<thead>
<tr>
<th>10</th>
<th>15</th>
<th>19</th>
<th>22</th>
<th>28</th>
<th>32</th>

</tr>
</thead>
</table>

1.1 Give a minimum mark scored by a learner in Grade 12C. (2)

1.2 Determine the modal mark for Grade 12A. (2)

1.3 Calculate the mean for Grade 12B. (2)

1.4 Give a value which is an outlier in Grade 12B. (2)

1.5 Calculate the interquartile range for Grade 12C. You may use the formula: $IQR = Q_3 - Q_1$ (2)

1.6 Write down the values of the five-number summary for Grade 12A. (5)

1.7 If a learner is randomly chosen from Grade 12C, find the probability (as a decimal) of choosing a learner who scored more than 50 marks. (3)

1.8 What is the percentage of learners who scored less than the first quartile in Grade 12A? (2)

1.9 Calculate the range for Grade 12B. (2)
Question 2

The following table shows the results of 14 Mathematical Literacy learners in Grade 12A.

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th>98</th>
<th>68</th>
<th>90</th>
<th>76</th>
<th>84</th>
<th>102</th>
<th>121</th>
<th>132</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>65</td>
<td>79</td>
<td>A</td>
<td>B</td>
<td>B</td>
<td>B</td>
<td>B</td>
<td>B</td>
<td>B</td>
<td>B</td>
<td>B</td>
<td>B</td>
</tr>
</tbody>
</table>

2.1 Given that the range of these marks is 78. Calculate the value of A which is the lowest mark.

[Note: B represents the same value for some learners and is not the highest mark.] (3)

2.2 Given that the mean for the set of data is 90. Calculate the value of B. (4)

2.3 Find the probability that a learner chosen will be in the top 75%. (1)

TOTAL: 30
Targeted Worksheet 3

Topic: Measurement

Content summary

- Calculate travel distance, time taken to complete a journey, speed, Body Mass Index (BMI).
- Use BMI values and Road to Health/growth charts.
- Determine the medicine dosages using formulae or growth charts.
- Calculate volume i.e., alcohol content in medicine.
- Calculate and measure perimeter and area of rectangles, triangles, circles (quarter, semi and three-quarters).
- Calculate and measure surface area of cylinders and rectangular boxes.
- Find volumes and areas of objects made up of cylinders and rectangular 3D shapes.
- Do calculations involving mass, time and temperature.
Question 1

The diagram shows a patch of cloth which is used to make a dress.

Diagram of a patch of cloth

1.1.1 Calculate the perimeter of the whole patch. (3)
1.1.2 Calculate the area of rectangle A. (3)
1.1.3 Determine the height of the whole patch. (2)
1.1.4 Calculate the area of triangle C. (2)

1.2 John has a weight of 65 000 g and a height of 165 cm.
Calculate John’s Body Mass Index (BMI), round off the answer to two decimal places.

You may use the formula:

\[
\text{BMI} = \frac{\text{weight in kg}}{(\text{height in metres})^2}
\]

(5)
Question 2
The diagram below shows a rectangular prism-shaped water trough made of concrete.

Outer dimensions of Water trough

| length = 3 m | width = 685 mm | height = 40 cm |

[1 ℓ (litre) = 1 000 cm³]

2.1 Calculate, in cm³, the volume of concrete used to make the water trough if the trough can hold a maximum of 485 ℓ water. (7)

2.2 A cow drinks 56 ℓ water per day. Zipho states that a full trough has enough water for 8 cows per day. Verify with calculations whether this statement is correct. (4)

2.3 Determine how long to the nearest minute, it will take to fill a half-full trough if the water flows in at a rate of 14.5 ℓ per min. (4)

TOTAL: 30
Targeted Worksheet 1 Answers

Topic: Finance

Question 1

1.1 Cost in New York = 178,57 \times 14,52
= R2 592,84 ✓

Cost in London ✓
= R2 927,93 ✓

Saving = 2 927,93 – 2 592,84 ✓
= R335,09 ✓

1.2 Price of sneakers = \frac{3 000}{1,059} ✓✓
= R2 832,86 ✓

Question 2

2.1 Price excluding VAT = \frac{11 999,00}{1,15} ✓✓

2.2 Deposit amount = 0,10 \times 11 999,00 ✓
= R1 199,90 ✓

2.3 Total amount = 1 199,90 + (526,19 \times 24) ✓
= 1 199,90 + 12 628,56 ✓
= R13 828,46 ✓

2.4 Total cost = 10 \times 2,75 ✓
= R27,50 ✓

2.5 Length of call = \frac{18,00}{2,25} ✓

Question 3

3.1 Annual taxable income = 267 000 \times 12 ✓✓

3.2 Tax = 63 853 + 0,31(320 400 – 305 850) ✓✓
= 63 853 + (0,31 \times 14 550) ✓

Tax payable = 68 363,50 – 14 067 ✓
= 54 296,50 – [(310 \times 2 \times 2) + (209 \times 12)] ✓
= R44 248,50 ✓

Monthly income tax = 44 248,50 \div 12 ✓
= R3 695,71 ✓

TOTAL: 30
Targeted Worksheet 2 Answers

Topic: Data handling

**Question 1**

1.1 Minimum mark for Grade 12C = 25 ✓✓ (2)

1.2 Modal mark for Grade 12A = 41 ✓✓ (2)

1.3 Mean for Grade 12B = \( \frac{19 + 21 + 21 + \ldots + 55 + 58 + 89}{24} \)

\[ = \frac{900}{24} \] ✓ ✓

\[ = 37,5 \] ✓ (2)

1.4 Outlier in Grade 12B = 89 ✓✓✓ (2)

1.5 IQR for Grade 12C = \( Q_3 - Q_1 \)

\[ = 48 - 33,5 \] ✓ ✓

\[ = 14,5 \] ✓ (2)

1.6 Minimum=10 ✓

\[ Q_1 = 32 \] ✓

\[ Q_2 = 41 \] ✓

\[ Q_3 = 47,5 \] ✓

Maximum = 85 ✓

1.7 \[ P(\text{scored more than 50 marks}) = \frac{5}{24} \] ✓✓

\[ = 0,21 \] ✓ (3)

1.8 Percentage = 25% ✓✓ (2)

1.9 Range of Grade 12B = 89 – 19 ✓

\[ = 70 \] ✓ (2)

[22]

**Question 2**

2.1 Range = max – min

\[ 78 = 132 - A \] ✓

\[ A = 132 - 78 \] ✓

\[ A = 54 \] ✓ (3)

2.2 Mean = \( \frac{\text{sum of the numbers}}{14} \)

\[ 90 = \frac{65 + 79 + B + 98 + 54 + 68 + 90 + 76 + 84 + B + 102 + 121 + 132 + B}{14} \] ✓

\[ 90 \times 14 = 969 + 3B \] ✓

\[ 1260 - 969 = 3B \] ✓

\[ 291 = 3B \]

\[ \frac{291}{3} = B \]

\[ B = 97 \] ✓ (4)

2.3 Probability is \( \frac{1}{4} \) or 25% or 0,25 ✓ (1)

[8]

**TOTAL: 30**
Mathematical Literacy Grade 12

Targeted Worksheet 3 Answers

Topic: Measurement

Question 1

1.1.1 Perimeter of patch = \((\frac{120}{10}) + 4 + 2 + 2 + 10 + 6 + 2 + 2 + 4\)
   \[= 46 \text{ cm} \]
   \[\checkmark\]
   \[\checkmark\]
   \[3\]

1.1.2 Area of rectangle A = \(12 \times 4\)
   \[= 48 \text{ cm}^2 \]
   \[\checkmark\]
   \[\checkmark\]
   \[3\]

1.1.3 Height of patch = 6 + 2 + 4
   \[= 12 \text{ cm} \]
   \[\checkmark\]
   \[2\]

1.1.4 Area of triangle C = \(\frac{1}{2} \times \text{base} \times \text{height}\)
   \[= \frac{1}{2} \times 8 \times 6 \]
   \[= 24 \text{ cm}^2 \]
   \[\checkmark\]
   \[2\]

1.2 BMI = \(\frac{\text{weight in kg}}{(\text{height in metres})^2}\)
   weight in kg: 65 000 ÷ 1 000 = 65 kg
   height in m: 165 ÷ 100 = 1,65 m
   \[\frac{65 \text{ kg}}{(1,65 \text{ m})^2} \]
   \[= 23,87511478 \]
   \[\checkmark\]
   \[= 23,88 \text{ kg/m}^2 \]
   \[\checkmark\]
   \[5\]

Question 2

2.1 Length in cm: 3 \times 100 = 300 cm
   \[\checkmark\]
   width in cm = 685 ÷ 10 = 68,5 cm
   \[\checkmark\]
   Volume of trough including concrete = \(300 \times 68,5 \times 40 \)
   \[= 822 000 \text{ cm}^3 \]
   \[\checkmark\]
   Volume of water if trough is full = 485 \times 1 000
   \[= 485 000 \text{ cm}^3 \]
   \[\checkmark\]
   Volume of concrete used to make a water trough = 822 000 – 485 000
   \[= 337 000 \text{ cm}^3 \]
   \[\checkmark\]
   \[7\]

2.2 Amount of water per cow = 56 ℓ \times 1 000 = 56 000 cm³
   \[\checkmark\]
   Water for 8 cows
   Water in trough when full 485 000 cm³
   Therefore the statement is correct. There will be enough water for 8 cows per day.
   \[\checkmark\]
   \[4\]
   OR
   Amount of water per cow = 56 ℓ
   Water for 8 cows = 56 \times 8 = 448 ℓ
   Water in the trough when full = 485 ℓ
   Therefore the statement is correct. There will be enough water for 8 cows per day.
   \[\checkmark\]
   \[4\]
Targeted Worksheet 3 Answers

2.3 Volume of half-full trough = $\frac{485\,000}{2} = 242\,500\,\text{cm}^3$ ✓
rate of flow = $14,5 \times 1\,000 = 14\,500\,\text{cm}^3\text{ per min} ✓$
time taken to fill half-full trough: $\frac{242\,000}{14\,500} = 16,724137931\,\text{min} ✓$

OR
Volume of half-full trough = $\frac{485}{2} = 242,5\,\text{l}$ ✓
Rate of flow = 14,5\,\text{l per min} ✓
Time taken to fill half-full trough minutes ✓
= 17\,\text{min} ✓

Assignment
Assignment

Instructions

Read the following instructions carefully before answering the questions.

1. Answer ALL the questions.
2. Show ALL calculations, diagrams, graphs, etc. which you have used in determining your answers.
3. An approved scientific calculator (non-programmable and non-graphical) may be used, unless stated otherwise.
4. If necessary, answers should be rounded off to TWO decimal places, unless stated otherwise.
5. Number your questions correctly according to the numbering system used in this question paper.
6. Diagrams are NOT necessarily drawn to scale.
7. It is in your own interest to write LEGIBLY and to present your work neatly.

Question 1

The distance from Cape Town to Johannesburg is 1 580 km.

1.1.1 Write down the distance in metres. (1)
1.1.2 If a motorist travels at 110 km/h, determine the time he takes in hours and minutes. (4)
1.1.3 If the motorist arrives in Johannesburg at 17:15, at what time did he leave Cape Town? (2)
1.1.4 If the car uses on average 1 litre of petrol for every 12,5 km. Calculate how many litres of petrol will be used for the trip. (3)

1.2 The following set of numbers show marks obtained by 12 Mathematical Literacy learners. A represents the lowest mark.

68; A; 55; 59; 65; 54; 75; 64; B; 80; 77; 73.

1.2.1 If the range for the marks is 30 determine the value of A. (2)
1.2.2 Given the mean for the data is 63, determine the value of B. (3)
1.2.3 Arrange the data in ascending order and determine the median. (3)
1.2.4 Determine the upper quartile. (2)
The following is a bank statement for Mpho.

<table>
<thead>
<tr>
<th>Transaction details</th>

</tbody>
</table>

- Sanitation is charged up to a maximum of 35 kl.
- Domestic Full = Standalone houses.
- Domestic Cluster = Flats, sectional title units, cluster developments and gated villages.

1. **Mr Willy** is under the free indigent household. Calculate his water bill for the month of September if he uses 35 kl of water.  
2. **Mr Gordon** is not under the indigent households. Calculate his sanitation bill if he uses 25 kl.  
3. The sanitation bill for **Mr Gordon** is VAT inclusive, calculate his bill before VAT was added.  
4. **Mr Cleo**, who is also not under the indigent households, made a payment of R580 towards his sanitation tariff. Determine how many litres of water he used for that month.

**TOTAL:** 70
Question 1

1.1.1 Distance in metres: 1 580 000 m ✓

1.1.2 Time taken = \( \frac{1 580}{110} \) = 14,36363636 hours ✓✓
   = 14 hours 22 minutes ✓

1.1.3 Time of departure: 17:15 − 14:22 ✓
   = 02:53 ✓

1.1.4 Litres of petrol used = \( \frac{1 580}{12,5} \) = 126,4 litres ✓✓✓

1.2.1 Range = maximum – minimum
   30 = 80 − A ✓
   A = 80 − 30
   A = 50 ✓

1.2.2
   \[
   \frac{68 + 50 + 55 + 59 + 65 + 54 + 75 + 64 + 80 + 77 + 73 + B}{12} = 63 ✓
   \]

202x472 = 63
   700 + B = 756
   B = 765 − 700 ✓
   B = 56 ✓

1.2.3 50; 54; 55; 56; 59; 64; 65; 68; 73; 75; 77; 80. ✓
   median = \( \frac{64 + 65}{2} \) = 64,5 ✓✓

1.2.4 Upper quartile = \( \frac{73 + 75}{2} \) = 74 ✓✓

Question 2

2.1 Debit means an amount which is withdrawn from the account. ✓✓

2.2 A negative balance brought forward means that the account has been overdrawn with that amount. ✓✓

2.3 Claremont ✓

2.4 A = −2 560 + 300 = −R2 860 ✓✓
   B = −2 860 − (−3 120) = −R260 ✓✓
   C = −3 120 + 500 = −R2 620 ✓✓
   D = −3 120 + 500 + 12 800 = R10 180 ✓✓
   E = 10 180 − 700 = R9 480 ✓✓
Question 3

3.1 \[27,062 + 0.26(321,600 - 205,901)\] ✓✓
\[= R67,143.74\]
\[≈ R67,144\] ✓

3.2 Annual taxable income: \[25,000 \times 12 = R420,000\] ✓✓

3.3 Annual Medical credits = \[(310 + 310 + 209 \times 3)\]
\[= 1,247 \times 12 ✓\]
\[= R14,964 ✓\]

3.4 Tax payable = \[67,144 + 0.21(420,000 - 321,601)\] ✓✓
\[= R97,647.69 ✓\]
Net tax payable = \[97,647.69 - 15,714 - 14,964 ✓ ✓ ✓\]
\[= R68,317.69 ✓\]
Monthly tax = \[\frac{68,317.69}{12} = R5,693.14 ✓ ✓ ✓\]

Question 4

4.1 Water steps (1 kl = 1 000 litres)
<table>
<thead>
<tr>
<th>Water consumed</th>
<th>Amount due</th>
</tr>
</thead>
<tbody>
<tr>
<td>Step 1 (0 ≤ 4 kl)</td>
<td>4 kl</td>
</tr>
<tr>
<td>Step 2 (&gt; 4 ≤ 10,5 kl)</td>
<td>4.5 kl</td>
</tr>
<tr>
<td>Step 3 (&gt; 10,5 ≤ 24 kl)</td>
<td>24 kl ✓</td>
</tr>
<tr>
<td>Total amount due</td>
<td></td>
</tr>
</tbody>
</table>

4.2 Water steps (1 kl = 1 000 litres)
<table>
<thead>
<tr>
<th>Amount Used</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Step 1 (0 ≤ 4,2 kl)</td>
<td>4,2 kl</td>
</tr>
<tr>
<td>Step 2 (&gt; 4,2 ≤ 7,35 kl)</td>
<td>3,15 kl</td>
</tr>
<tr>
<td>Step 3 (&gt; 7,35 ≤ 24,5 kl)</td>
<td>17,15 kl</td>
</tr>
<tr>
<td>Step 4 (&gt; 24,5 ≤ 35 kl)</td>
<td>0,5 kl</td>
</tr>
<tr>
<td>Total bill</td>
<td></td>
</tr>
</tbody>
</table>

4.3 Bill before VAT = \[\frac{100}{115} \times 741.70 ✓ ✓\]
\[= R644.96 ✓\]

4.4 \[580 - 66.11 = R513.89\] ✓
\[4,2 kl ✓\]
\[513.89 - 70.56 = R443.33\] ✓
\[3,15 kl ✓\]
\[443.33 ÷ 33.52 = 13.23 kl ✓\]
Total kilolitres = \[4.2 - 3.15 + 13.23\]
\[= 10.5 kl ✓\]

Control Test (Term 2)

Question 1

A Municipality buys Jojo tanks to harvest rainwater. The tanks will be supplied to 84 272 households.

1 000-litre tanks cost R1 922, 00
2 500-litre tanks cost R3 089, 50
5 000-litre tanks cost R5 993, 00

1 000 cm³ = 1 litre

1.1 Determine the total cost if the Municipality supplies 2 500-litre tanks to all the households. (3)

1.2 Calculate the difference in the expenditure between buying 5000-litre tanks and 1 000-litre tanks for all the households. (6)

1.3 Write down the ratio in its simplest form of the capacity of the three tanks. (2)

1.4 The price of the water tanks is VAT- inclusive. Calculate the VAT amount when buying 2 500-litre tanks for the 84 272 households. [VAT is 15%]. (6)

1.5 Given that a household consumes 144 000 cm³ of water a day. Calculate the number of days it will take for the household to consume all the water in a 2 500-litre tank. Round off your answer to the nearest whole number. (4)

1.6 The manufacturer predicts a price increase of about 3,3 %. Calculate the new price of a 5 000-litre tank. (3)

Question 2

An entrepreneur bakes and sells scones. The recipe for baking scones is given below.

She uses the following ingredients to make 12 scones:

- 2 1/2 cups flour
- 1/3 cup sugar (1/2 for sweeter scones)
- 1 tablespoon baking powder
- 1/2 teaspoon salt
- 8 tablespoons butter
- 2/3 cup milk

Method:
Mix the dry ingredients in a large bowl. Add butter and mix until crumbs are formed. Add milk. Place the dough on a floured counter. Pat and roll into a circle of 1 1/2 inches thick. Cut into 12 squares. Place on a greased tray and bake for 12 minutes.
Control Test (Term 2)

2.1 Determine:

2.1.1 how much flour, in ml, is needed to bake 36 scones (3)

2.1.2 the thickness of the dough, in cm. (2)

2.2 Calculate how much sugar, in ml, is needed to make 12 sweeter scones. (2)

2.3 To bake 48 scones determine:

2.3.1 the number of teaspoons of salt required (2)

2.3.2 how much butter, in ml, is needed. (2)

2.4 Given that it took 1 hour 40 minutes to make the scones and that she finished at 09:15, determine the time she started baking. (2)

Question 3

The picture below shows a braai area with a circular pool. The braai area is a square with length 15 m.

3.1 Determine the area of the pool. (3)

\[ \text{Area of a circle} = \pi r^2, \text{ where } \pi = 3.142 \]

3.2 The area surrounding the swimming pool is to be paved. Determine the area to be paved. (3)

\[ \text{Area} = \text{length } \times \text{ width} \]

3.3 The paving bricks are sold in pallets of 1 000 bricks.

• each pallet costs R3 500

• 48 bricks cover a square metre

Calculate the cost of paving the braai area with bricks. (6)

3.4 The truck delivering the bricks uses 1,17 litres of fuel per km.

3.4.1 Given that it travels 76 km, calculate the number of litres used to deliver the bricks. (2)

3.4.2 If the truck travels at a speed of 40 km/h, find the time taken, in hours and minutes, to travel the 76 km. (3)
Question 4

4. Jim is a 43-year old manager who earns R370 000 per annum. He contributes to a medical aid fund for himself, his wife and their two children. Use Annexure B to answer the following questions.

4.1 Determine his total medical credit per year. (3)

4.2 He contributes R4 380 income tax per month and has been complaining that he is being overtaxed. Use the necessary calculations to prove whether his complaint is valid or not. (8)

[11]

Question 5

5. The route map of the Medihelp Stellenbosch Cycle Tour is shown in ANNEXURE A. Use ANNEXURE A to answer the questions that follow.

5.1 Write down the name of the first town that the cyclists will reach once they have started the race? (2)

5.2 If they started the race at 09:00 and the cut-off time to finish the race is 13:30, how much time do they have to finish the race? (2)

5.3 Write down the general direction that Wellington is from Stellenbosch? (2)

5.4 How many water points are available on the route? (2)

5.5 Name the mountain pass that is situated on the route. (2)

[10]

Question 6

6.1 A High School decides to sell cellphone protectors with the school’s badge and the person’s name on it. Some of the profit will be used to establish a new computer laboratory.

A cellphone protector
- The production cost for the personalised cellphone protectors is given by the following formula:
- Production cost of the cellphone protectors = R3 000 + (R40 \times \text{number of cellphone protectors})
- The personalised cellphone protectors will be sold for R90,00 per protector.
Control Test (Term 2)

### TABLE 1: Production cost and income for selling cellphone protectors

<table>
<thead>
<tr>
<th>Number of cellphone protectors</th>
<th>0</th>
<th>100</th>
<th>300</th>
<th>500</th>
<th>800</th>

</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Please note that Atlang Suites reserves the right of access to the facility.
Question 1

1.1 Total cost = 84 272 × 3 089,50
= R260 358 344,00

1.2 Total cost of 5 000 ℓ-water tanks
= 84 272 × 5 993,00
= R505 042 096,00

1.3 Ratio: 1 000 : 2 500 : 5 000 = 2 : 5 : 10

1.4 Total including VAT = 84 272 × 3 089,50
= R260 358 244,00

1.5 144 000 ÷ 1 000 = 144 ℓ

1.6 New price of water tank
= \[ \frac{103.3}{100} \times 5 993,00 \]
= R6 190,77

Question 2

2.1.1 No. of millilitres of flour for 12 scones
= 2 \( \frac{1}{2} \) × 250
= 625 ml

2.1.2 Thickness of the dough in centimetres
= 1 \( \frac{1}{2} \) × 2.54
= 3.81 cm

2.2 No. of millilitres of sugar
= \( \frac{1}{3} \) × 250
= 83.33 ml

2.3.1 No. of teaspoons = 0.5 × 4
= 2 teaspoons

2.3.2 No. of millilitres of butter:
= 8 × 15 × 4 = 480 ml

2.4 Time = 09:15 – 01:40 = 07:35

Question 3

3.1 Area of swimming pool:
= \( \pi r^2 \)
= \( 3.142 \times 3^2 \)
= 28.278 m²

3.2 Area = length × width = 15 × 15
= 225 m²

3.3 No. of bricks = 196,72 × 48
= 9 442,56
= 9 443 bricks

3.4.1 Number of litres = 76 × 1,17
= 88.92 litres

3.4.2 Time = \( \frac{76}{40} \) = 1,9 hours
= 1 hour 54 minutes

Question 4

4.1 Total medical credits per year:
= 310 + 210 + 290 + 290
= R1 200 × 12
= R14 400

4.2 Tax payable
= 63 853 + 0.31(370 000 – 305 850)
= R83 739,50

Net tax payable
= 83 739,50 – 14 067 – 14 400
= R55 272,50

Monthly income tax = \( \frac{55.272.50}{12} \)
= R4 606,04

His complaint is not valid.
Question 5

5.1 Pniel ✓✓ (2)

5.2 Time to finish race: 13:30 – 09:00 ✓
= 4 hours 30 minutes / 4,5 hours / 4/2 hours ✓ (2)

5.3 North East / NE ✓✓ (2)

5.4 5 water points ✓✓ (2)

5.5 Helshoogte Mountain Pass ✓✓ (2)

Question 6

6.1.1 \[ A = 3000 + (40 \times 800) \] ✓
= R35 000 ✓

B = 90 \times 300 ✓
= R27 000 ✓ (4)

6.1.2 Numerical data is information that is something that is measurable. It is always collected in number form, although there are other types of data that can appear in number form. An example of numerical data would be the number of cars/trucks sold, people that attended the movie theater over the course of a month etc. ✓✓ (2)

OR Any acceptable response.

6.2.1 \[ \frac{\text{4 308}}{14,497} \times \frac{100}{1} \] ✓✓
= 29,71649% ✓

-29,71649% because the numbers declined year-on-year. ✓ (4)

6.2.3

Trial Examination Papers
Instructions
1. This question paper consists of FIVE questions. Answer ALL the questions.
2. Use the annexures to answer the following questions:
   ANNEXURE A for Question 3.1
   ANNEXURE B for Question 4
3. Number the answers correctly according to the numbering system used in this question paper. Please use ANSWER SHEET 1 for Question 2.3.2.
4. Start EACH question on a NEW page.
5. You may use an approved calculator (non-programmable and non-graphical), unless stated otherwise.
6. Show ALL the calculations clearly.
7. Round off ALL final answers appropriately to the given context, unless stated otherwise.
8. Indicate units of measurement, where applicable.
9. Maps and diagrams are NOT necessarily drawn to scale, unless stated otherwise.
10. Write neatly and legibly.

Question 1

1.1 The cost price of an infrared thermometer imported from India was R500 in June 2019 and R565 in June 2020.
   
1.1.1 Explain the term “inflation” within the given context. (2)
1.1.2 What is the difference between the prices, in rands? (2)
1.1.3 Calculate the selling price of an infrared thermometer in July 2020 if there was a 40% mark-up. (2)

1.2 During the Covid-19 crisis in 2020 the South African Rand (ZAR) declined to a record low level compared to some other currencies. Below is a table indicating the exchange rates as on 20 May 2020.
Use TABLE 1 and the information above to answer the questions that follow.

1.2.1 On what date were the exchange rates recorded? (2)
1.2.2 How many South African rands (ZAR) are equivalent to 1 British Pound? (2)
1.2.3 What is the name of the currency used in Japan? (2)
1.3 With faster internet being easily accessible for the public in South Africa, there has been a drastic increase in subscribers to streaming services.

The graph below shows the distribution of subscribers to streaming services in South Africa.

1.3.1 Write down the most popular streaming platform in South Africa? (2)
1.3.2 Calculate the percentage of people subscribing to Iflix as represented by A. (2)
1.3.3 Rank the streaming platforms in descending order. (2)
1.3.4 What type of graph was used to illustrate the data? (2)
Question 2

2.1 Below is an extract of a bank statement for Solly Sibeko. Study the bank statement and answer questions that follow.

| MAGIC BANK |
|------------------|------------------|------------------|
| **Customer Name** | Solly Sibeko | **Statement Date** | June |
| **Address** | 13 Mdu Road Langa | **Account No** | ****0048 |

Use the information above to answer the questions that follow:

2.1.1 Define the term “transaction fee”. (2)

2.1.2 Calculate the value of A. (3)

2.1.3 Calculate Solly’s annual net salary (3)

2.1.4 Is the final balance in the account a credit or a debit balance? Explain your answer. (2)

2.1.5 Solly has a cell phone contract with a subscription fee of R85,00 per month. How much extra did he spend on his cell phone in June? (2)

2.1.6 Assume that no further transactions are done on the final balance. Calculate the interest rate that Solly will receive from the bank in June. (3)
Trial Examination Paper 1

2.1.7 Magic Bank uses the following formula to calculate the transaction fee if the money is deposited at the branch ATM:

**Transaction fee = R2,50 + 0,95% of the amount deposited**

Use the formula above to calculate the transaction fee of 15 June.
Round your answer to 2 decimal places. (3)

2.1.8 Calculate the total transaction fees that Solly paid in the month of June? (3)

2.2 Solly and his wife, Queen, are about to buy their first house through Magic Bank. The property (house) they are interested in costs R580 440,00 (inclusive of transfer costs and lawyer fees). Solly and Queen managed to raise a deposit of 25%.

Magic Bank granted them a home loan at 10,75% interest for the balance of the loan over a period of 30 years.

**TABLE 2: Bond repayment factors**

<table>
<thead>
<tr>
<th>Interest %</th>
<th>Years</th>
<th>15</th>

<td>11,52</td>
<td>11,52</td>
<td>9,98</td>
<td>9,71</td>
</tr>
</tbody>
</table>

Use TABLE 2 and the information above to answer the questions that follow:

2.2.1 Explain the term “home loan”. (2)

2.2.2 How long will they take to pay back the bank if the bond repayment factor is 10,15 and the interest rate is 10,75%? (2)

2.2.3 Calculate the amount that Magic Bank loaned to Solly and Queen. (4)

2.2.4 Calculate the monthly repayment amount that Solly must pay on the loaned bond. Use the formula below and the table above:

**Monthly repayment = \( \frac{\text{bond amount}}{1 000} \times \text{bond repayment factor} \)** (4)

2.2.5 Calculate the total amount that they will have paid at the end of the loan term. (2)
2.3 Solly starts a new job but he does not have his own computer. He decides to buy a new cell phone with unlimited web-browsing. The table below illustrates the cost of three different deals from a cell phone company.

<table>
<thead>
<tr>
<th>DEAL</th>
<th>Phone and internet costs</th>
<th>Call costs</th>
</tr>
</thead>
<tbody>
<tr>
<td>DEAL 1</td>
<td>R8 000 cash for the phone</td>
<td>R2,50 per minute</td>
</tr>
<tr>
<td></td>
<td>R150 per month for internet</td>
<td></td>
</tr>
<tr>
<td>DEAL 2</td>
<td>R250 per month over 24 months including internet and phone</td>
<td>50 free minutes R2,00 per minutes for calls after free minutes used</td>
</tr>
<tr>
<td>DEAL 3</td>
<td>R400 per month over 24 months including internet and phone</td>
<td>50 free minutes R1,50 per minute for calls after free minutes used.</td>
</tr>
</tbody>
</table>

The graph for DEAL 2 is given in ANSWER SHEET 1.

The following table indicates the cost of the different deals for a certain amount of minutes per month.

**TABLE 3: The total cost for three different deals from a cell phone company**

<table>
<thead>
<tr>
<th>DEAL</th>
<th>Minutes</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>0</td>
</tr>
<tr>
<td>COST FOR DEAL 1 (R)</td>
<td>150</td>
</tr>
<tr>
<td>COST FOR DEAL 2 (R)</td>
<td>250</td>
</tr>
<tr>
<td>COST FOR DEAL 3 (R)</td>
<td>400</td>
</tr>
</tbody>
</table>

Use TABLE 3 and the information above to answer the questions:

2.3.1 How much will Solly pay in cash for the phone if he chooses DEAL 1?  

2.3.2 Use the values in TABLE 3 and draw line graphs for DEAL 1 and DEAL 3 on the same set of axes on ANSWER SHEET 1.

**Question 3**

3.1 Andrew is 58 years old and works for a big company. His gross monthly income is R44 690. The following deductions are deducted from his salary monthly:

- Pension: R2 687
- Medical Aid: R3 950
- Labour Union fees: R80
- Income Tax:

The pension fund contribution is non-taxable.

ANNEXURE A shows the annual Tax tables for 2018/2019. Use ANNEXURE A to answer the following questions:

3.1.1 Andrew is married and has one child. They are all on his medical aid. Calculate Andrew’s annual medical aid credits.
3.1.2 Calculate Andrew's annual taxable income (3)

3.1.3 Calculate the monthly income tax that Andrew will pay after rebates. (7)

3.2 James and Andrew decide to host a dinner in order raise money to go and watch the Formula One Grand Prix in Italy. They budget for an income of R25 000.

The cost of the dinner is as follows:

- R100 per person
- If a couple buys two tickets, they receive 10% discount on their total price.

There were 86 couples and 102 single people who attended the dinner. Verify, showing all calculations, whether they reached their budgeted amount. (5)

3.3 Due to Covid-19, James and Andrew decide to postpone their Formula One visit to 2022.

A ticket would have been $455 in 2020. Calculate the projected ticket price in two years' time if the projected inflation rate is 3,7% in 2021 and 2,8% in 2022. (4)

3.4 TABLE 3 below shows the price and Hire Purchase options of a Defy Dishwasher as advertised by two companies.

**TABLE 3: Comparison of prices of a dishwasher at two companies:**

<table>
<thead>
<tr>
<th></th>
<th>COMPANY A</th>
<th>COMPANY B</th>
</tr>
</thead>
<tbody>
<tr>
<td>DEFY DDW356</td>
<td>R7 999,00</td>
<td>R7 599,00</td>

<tr>
<td>Metallic cornerwash dishwasher</td>
<td>CASH PRICE</td>
<td>CASH PRICE</td>
</tr>
<tr>
<td>Deposit: R799,90</td>
<td>Monthly Instalment: R423,65</td>
<td>Deposit: R760,00</td>
</tr>
<tr>
<td>Contract Term: 30 Months</td>
<td>Service Fee: R69,00</td>
<td>Monthly Instalment: 36 Months</td>
</tr>
<tr>
<td>Initiation Fee: R633,32</td>
<td>Credit Life Insurance: R637,50</td>
<td>Additional costs: R1 599,00</td>
</tr>
</tbody>
</table>

NOTE: Water temperature needs to be between 140 and 145 degrees Fahrenheit to sanitise the dishes.

3.4.1 The total cost of buying the dishwasher on Hire Purchase at Company A is R14 849,22. Use TABLE 3 to calculate the difference in the total Hire Purchase cost of the dishwasher between Company A and Company B. (5)

3.4.2 A customer opted for the Hire Purchase option of Company B but could only afford to pay R185,00 as an instalment for May and June. The company adds 30% interest per month on instalments in arrears. TABLE 4 below shows what was paid without the interest included. Use TABLE 4 to calculate the instalment for July if he needs to pay the outstanding balance as well as additional compound interest that was accumulated. Show all calculations.
TABLE 4: Summary of payments on Hire Purchase (HP)

<table>
<thead>
<tr>

<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Note: Arrears are the outstanding amounts on the full instalment.

Question 4

ANNEXURE B shows a bar graph of the internet access of households per province as a percentage in 2017. The internet access at home or anywhere is shown. The table shows the number of households per province in thousands for the years 2016, 2017 and 2018.

Use the graph along with the table in ANNEXURE B to answer the questions that follow:

4.1 Determine the range of the number of households of the provinces in 2016. (3)

4.2 Determine the province that was the median for the number of households in 2018. Show all the necessary steps. (2)

4.3 John argues that the number of households that had internet access at home in the Western Cape (WC) in 2017 was more than that of Gauteng for the same year. He bases his argument on the fact that the percentage household of Western Cape (WC) with internet access at home was more than that of Gauteng (GP). Verify, showing all calculations, that John's statement is valid. (6)

4.4 Use the box-and-whisker plots below and the table in ANNEXURE B showing the number of households per province, to answer the questions that follow:

Number of households per province in 2017 & 2018

<table>
<thead>
<tr>
<th></th>
<th>2018</th>
<th>2017</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>

a) The Inter-Quartile Range (IQR) of the number of households per province in 2018 is 1 340,5. Calculate the IQR of 2017 and compare it with the IQR of 2018. (5)

b) Which province's number of households, in comparison to the rest of the provinces' number of households, can be regarded as an outlier? Provide a reason for your answer. (3)
Mathematical Literacy Grade 12

Trial Examination Paper 1

4.5 Determine the probability (as a percentage), of randomly selecting a household in 2017 in South Africa that does not have access to internet at home. (2)

Question 5

5.1 Covid-19 (Novel Coronavirus) caused a global pandemic in 2020. TABLE 4 below shows some information regarding the statistics of this disease.

**TABLE 4: Countries, territories or areas with reported, laboratory confirmed Covid-19 cases and deaths. Data as on 9 June 2020.**

<table>
<thead>
<tr>
<th>Reporting Country / Territory / Area</th>
<th>Total Confirmed Cases</th>
<th>Total Confirmed new cases</th>

<tr>
<td>Burkina Faso</td>
<td>890</td>
<td>2</td>
<td>53</td>
<td>19,19</td>
</tr>
</tbody>
</table>

Use the information in TABLE 4 to answer the questions that follow.

5.1.1 Would this data be classified as discrete or continuous? (2)

5.1.2 Write down the highest number of confirmed cases. (2)

5.1.3 If 14,44% of Italy's total confirmed cases resulted in death, calculate the total number of deaths for Italy as indicated by A in the table. (2)

5.1.4 Arrange the countries in ascending order according to the total deaths. (2)

5.1.5 Calculate the percentage of Spain's total population that was reported as confirmed cases. (3)

5.1.6 Determine the mean number of cases reported by these countries (listed in the table above) if they reported a total of 2 649 656 cases between them. (2)

5.1.7 Determine the probability, as a simplified fraction, of randomly picking a country from this list with more than 1 000 total reported deaths. (3)

5.2 The government also recorded and released data monitoring the number of Covid-19 cases and the number of people who have recovered.

The information for South Africa on 11 August 2020 is shown in ANNEXURE D.

Use the information in TABLE 5 and the graph in ANNEXURE D to answer the questions that follow.

5.2.1 What was the probability of more than 100 000 recoveries being made in KZN by 11 August? (2)
5.2.2 Calculate the range of cases being reported per province in South Africa. (2)

5.2.3 Which province in South Africa had the second lowest number of cases on 11 August? (2)

5.3 Due to the outbreak of the Covid-19 pandemic in South Africa, the country had a nationwide lockdown, where all non-essential services (like take-away restaurants and many other institutions) had to be closed.

Many South Africans purchase take-away food regularly. TABLE 6 below indicates some financial information about certain fast-food restaurants.

**TABLE 6: Top fast-food restaurants that make the most money in South Africa (2017)**

<table>
<thead>
<tr>
<th></th>

<td>8,9%</td>
<td>561</td>
<td>R2,4</td>
</tr>
</tbody>
</table>

Use the information in TABLE 6 above to answer the questions that follow.

5.3.1 Calculate the missing value A for KFC’s revenue per outlet in millions. (3)

5.3.2 Determine the median according to the number of franchises/outlets in 2017. (2)

5.3.3 Identify the brand that had the lowest revenue in 2017. (2)

5.3.4 The correct amount in rands for the total revenue of Fish and Chip Co. and Wimpy combined earned in 2017 would be:

a) R813 000 000 000
b) R2 830 800 000
c) R81 282 000 000 000
d) R2 830 800 000 000

5.3.5 Determine the probability (as a percentage) of picking one of these brands that had a revenue of less than R1 000 000 000. (3)

5.3.6 Which of these brands had the highest percentage growth in 2017? (2)

**TOTAL: 150 marks**

Question 2.3.2

Total cost for the three different deals

- **DEAL 1**: Constant cost of R500
- **DEAL 2**: Linear increase from R0 at 0 minutes to R600 at 200 minutes
- **DEAL 3**: Linear increase from R100 at 0 minutes to R200 at 200 minutes
Instructions

1. This question paper consists of FIVE questions. Answer ALL the questions.
2. Use the annexures to answer the following questions:
   - ANNEXURE A for Question 4.1
   - ANNEXURE B for Question 4.2
   - ANNEXURE C for Question 4.3
3. Number the answers correctly according to the numbering system used in this question paper.
4. Start EACH question on a NEW page.
5. You may use an approved calculator (non-programmable and non-graphical), unless stated otherwise.
6. Show ALL the calculations clearly.
7. Round off ALL final answers appropriately to the given context, unless stated otherwise.
8. Indicate units of measurement, where applicable.
9. Maps and diagrams are NOT necessarily drawn to scale, unless stated otherwise.
10. Write neatly and legibly.

Question 1

1.1 James and Andrew are friends. Their favourite motor sport is Formula One racing. The next Formula One Grand Prix that Andrew and James wish to attend will take place in Italy.

The map below shows the race track for the Autodrom Nazionale Monza circuit in Italy, where the Formula One will take place.
Study the map to answer the following questions:

1.1.1 Calculate, to the nearest kilometre, the total distance of the race. (3)

1.1.2 Andrew and James wish to buy tickets for the Formula One Grand Prix in Italy. The ticket provider indicated that the following grandstand seat numbers are available: 12, 18, 21 and 4. They decide to buy tickets for Grandstand 4. Provide ONE possible reason for their choice. (2)

1.1.3 In the table below, Column A shows the sections on the track in the order of the race. Column B shows the different descriptions of the sections on the track. Write down only the correct letter (A, B, C or D) from column B that best describes the 3rd, 4th and 5th sections.

   [The correct descriptions for the 1st and 2nd sections have been completed for you and are indicated by “✓”.

<table>
<thead>
<tr>
<th>COLUMN A</th>
<th>COLUMN B</th>
</tr>
</thead>
<tbody>
<tr>
<td>Section on track</td>
<td>Description of section on track</td>
</tr>
<tr>
<td>-------------------</td>
<td>---------------------------------</td>
</tr>
<tr>
<td>1st</td>
<td>✓ From the starting line you will have a long straight stretch until a sharp right turn followed by a sharp left turn</td>
</tr>
<tr>
<td>2nd</td>
<td>✓ Continue straight until a slight bend to the right followed by a slight turn to the left</td>
</tr>
<tr>
<td>3rd</td>
<td>A Another long straight stretch with a right turn ending at the finish line</td>
</tr>
<tr>
<td>4th</td>
<td>B Continue with a short straight stretch followed by a bend to the right, a short straight and another bend to the right</td>
</tr>
<tr>
<td>5th</td>
<td>C Followed by a sharp left turn</td>
</tr>
<tr>
<td>6th</td>
<td>D Followed by another long straight stretch ending with a slight left and then right bend</td>
</tr>
</tbody>
</table>

1.2 Andrew has heard that the maximum fuel capacity of a Formula One race car is 39,63 gallons. Calculate the total cost to fill a Formula One race car to its maximum capacity, if fuel costs R31,81 per gallon. (2)
1.3 Rubens Barrichello, a Formula One race car driver, set a new lap record during the 2004 Autodrom Nazionale Monza race in Italy. His record lap time (in minutes and seconds) was 1:21,046. Calculate, in metres per second, the average speed achieved by Rubens Barrichello. You may use the following formula:

\[
\text{Distance} = \text{Speed} \times \text{Time}
\]

(4)

1.4 A High School wishes to establish a new computer laboratory and decides on a layout plan of the computer laboratory as shown below.

![Computer Laboratory Layout](image)

1.4.1 Write down the workstation number where you would sit if you enter the computer laboratory and turn to your right, pass between stations 7 and 13 and take the second last seat on your left, closest to the screen.

(2)

1.4.2 Give one possible reason for the data projector to be mounted on the ceiling.

(2)

1.4.3 Use the actual length of the southern wall of the computer laboratory to determine the scale of the floor plan. Give your answer as a ratio in the form: 1:

(5)

1.5 Andrew will be celebrating his son's birthday soon. He bought a ring cake with the height of 10 cm for his son's birthday. It has a circular opening inside and is covered with chocolate icing. The diameter of the outside ring of the cake is 16 cm and the radius of the inside ring is 3 cm.

Calculate the area of cake that will be covered with icing.

N.B. The inside opening and the bottom of the cake will not be covered.

Surface area of a big circle = \( \pi r^2 + 2\pi rh \)
Area of a small circle = \( \pi r^2 \)
Use \( \pi = 3.142 \)

(8)
Question 2

2.1 A family of six people are living in a water-restricted area in Cape Town where they may use 120 litres of water per person per day supplied by the municipality.

2.1.1 Calculate the maximum amount of water, in kilolitres, that this family may use in ONE month. (Use a 30-day month for your calculations).

2.1.2 TABLE 1 below shows the water tariff charges for Cape Town in 2019/2020. Use TABLE 1 to answer the question below.

TABLE 1: Water tariff charges

<table>
<thead>
<tr>
<th>Tariff summary (in kilolitre)</th>
<th>Tariff Rand per kilolitre (Without 15% VAT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 – 6 kl</td>
<td>15,58</td>
</tr>
<tr>
<td>More than 6 – 10,5 kl</td>
<td>22,17</td>
</tr>
<tr>
<td>More than 10,5 – 35 kl</td>
<td>31,47</td>
</tr>
<tr>
<td>More than 35 kl</td>
<td>69,06</td>
</tr>
</tbody>
</table>

1 kl = 1 000 litres

Janine, one of the family members, claims that they will pay less than R620 per month if the family uses their full municipal limit. Verify, showing all calculations, if the water bill per month, including VAT, is less than R620.

2.2 The family of six people decide to install eco water-storage tanks. This will enable them to use an additional 50% of the municipal limit of 120 litres per person per day.

They bought two eco-tanks with the following dimensions as shown in TABLE 2 below.

TABLE 2: Dimensions and cost of the eco-tank

<table>
<thead>
<tr>
<th>DIMENSIONS OF THE ECO-TANK</th>
<th>Diameter in cm</th>
<th>Height in cm</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dimensions</td>
<td>184</td>
<td>214</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>COST OF INSTALLING AN ECO-TANK</th>
</tr>
</thead>
<tbody>
<tr>
<td>Price per tank</td>
</tr>
<tr>
<td>R4 920 excluding VAT</td>
</tr>
</tbody>
</table>

1 000 cm³ = 1 litre
The two tanks with dimensions as shown above have been installed at their house. They will be filled with rain and borehole water.

2.2.1 Calculate the number of litres of water per day that the family can use from the water tanks. (3)

2.2.2 The family will need an additional 10 800 litres per month (30 days) from the tanks. Verify, with the necessary calculations, whether they will have enough water for a month if the tanks are full. (Note: The amount of water in a full tank is equal to the volume of the tank.) (6)

2.3 If it rains an average of nine days in September in Cape Town, determine the probability of randomly selecting a day in September that it will not rain. Give your answer as a fraction. (2)

---

**Question 3**

3.1 Michelle uses a recipe to make rusks for her husband. The recipe requires her to use a certain amount of buttermilk. Below is a picture of a rectangular buttermilk carton showing some of the measurements.

You may use the following formula:

\[
\text{Volume of a rectangular prism} = \text{length} \times \text{width} \times \text{height}
\]

3.1.1 Explain the term “capacity”. (2)

3.1.2 The buttermilk carton above contains 0,35 litres of buttermilk, convert the amount of buttermilk to millilitres. (2)

3.1.3 If the buttermilk carton has a square base, what is the dimension of the width, A? (2)
3.1.4 Calculate the volume (in cm³) of the carton. (4)

3.1.5 The four sides of the carton are printed with the producer’s logo and information about the buttermilk. There is no printing on the top and the bottom of the carton. Use the following formula to calculate the total surface area (in cm²) of the carton that can be used for printing.

\[
\text{Area used for printing} = 2(\text{width} \times \text{height}) + 2(\text{length} \times \text{height})
\]

(3)

3.2 Michelle uses the following ingredients to make rusks for her husband.

**Buttermilk rusks**

**Ingredients:**
- 1,5 kg self-raising flour
- 3 ml salt
- 10 ml cream of tartar
- 500 g butter
- 350 g sugar
- 500 ml buttermilk

The recipe makes 25 rusks.

3.2.1 Write down the amount of butter, in grams, you need to make 25 rusks. (2)

3.2.2 Convert the mass of self-raising flour required to grams (g). (2)

3.2.3 Michelle wants to bake 50 rusks. By how much must she increase the amount of the ingredients? (2)

3.2.4 Michelle calculates that it will take her 40 minutes to mix all of the ingredients and shape the mixture into rusks. At what time should she start mixing the ingredients if she wants to put the rusks in the oven to bake at 15:35? (2)

3.2.5 Michelle has a friend in America who wants to use this rusk recipe but her oven’s temperature is in degrees Fahrenheit. Convert 180 °C to °F.

You may use the following formula:

\[
\text{Temperature (in °F)} = \text{Temperature (in °C)} \times 1,8 + 32
\]

(2)

[23]

**Question 4**

4.1 Stefanie and her family from Australia are planning a visit to Cape Town. They will be visiting the Victoria & Alfred Waterfront during their time there.

ANNEXURE A shows a map of the Victoria & Alfred Waterfront.

Use the map in ANNEXURE A to answer the questions that follow.

4.1.1 What type of scale is used in this map? (2)

4.1.2 Identify the activity offered at East Pier Road. (2)
4.1.3 At which attraction site would a person be if they were to follow the directions below?

- Merge onto Dock Road from the N1
- Take the first exit at the Dock Road roundabout.
- Continue onto Dock Road and join Western Blvd on your left.
- Continue straight on Western Blvd / M6.
- Turn right into Portswood road.
- Turn left into Beach Road.

Your attraction site is the first one on the right. (2)

4.1.4 Stefanie’s family plan to drive to Cape Town from Durban and found the information below on Google maps:

Determine the average speed of this journey to the nearest km/h.

You may use the following formula:

\[
\text{speed} = \frac{\text{distance}}{\text{time}}
\]

(4)

4.2 While in Cape Town, Stefanie and her family stay in a rented apartment in Green Point. ANNEXURE B shows a basic outline of the apartment they will be staying in. Use the floor plan in ANNEXURE B to answer the questions that follow.

4.2.1 What is the maximum number of people that this apartment can sleep? (2)

4.2.2 If Bedroom 1 and Bedroom 2 have the exact same dimensions, determine the length of one of these bedrooms (in m). (2)
4.2.3 Write down the general direction that Bedroom 2 is from the front door (main entrance.) (2)

4.2.4 What fixture is indicated on the floor plan next to the fridge space? (2)

4.3 Stefanie plans buy suitcases in Cape town to sell in Australia. The bags are packed in boxes as indicated in ANNEXURE C and transported in Rogue boxes in a ship. All boxes should be packed upright.

Study ANNEXURE C and answer the following questions.

4.3.1 Show that the height of the Rogue box is 2,8 m if its capacity is 13,86 m³.

You may use the following formula:

\[
\text{Volume of rectangular box} = \text{Length \times Breadth \times Height}
\]

(4)

4.3.2 Tira claims that they should pack the boxes in a Rouge box as follows: Length of the packing box against the width of the Rogue box and width of the packing box against the length of the Rogue box, in order to pack more boxes on the base of the Rogue box. Verify his claim. (8)

4.3.3 Each suitcase is wrapped with a triple layer of bubble wrap plastic to protect it.

- The top and bottom of each suitcase are not covered.
- The dimensions of the suitcase are indicated below.

\[
\begin{align*}
\text{Length} & = 1.2 \text{ m} \\
\text{Width} & = 0.4 \text{ m} \\
\text{Height} & = 1.6 \text{ m}
\end{align*}
\]

\[
\begin{align*}
a) \text{ Determine the size of the plastic bubble wrap (total surface area) needed to cover the suitcase.} \\
\text{You may use the formula:} \\
\text{Surface area} & = 2(\text{length} \times \text{height}) + 2(\text{width} \times \text{height})
\end{align*}
\]

(5)

\[
b) \text{ Show that the length of the plastic needed to cover the suitcase is 960 cm.}
\]

(4)
Question 5

5.1 The diagram below shows the minimum opening sizes of a double door garage, surrounded by a wall built of a single layer of bricks.

Study the diagram and answer the questions that follow.

![Diagram of minimum double door opening sizes]

5.1.1 Identify the length of the minimum double door opening. Give your answer in metres. (2)

5.1.2 A is triple the distance marked B. Write down the distance marked A. (2)

5.1.3 Write down the height of the wall in metres. (3)

5.1.4 Determine the area of the single garage door opening if length is half the length of the double door garage opening and the height remains the same.

You may use the formula:

\[ \text{Area} = \text{Length} \times \text{Width} \] (4)

5.1.5 Calculate the area covered by bricks in m².

You may use the formula:

\[ \text{Area} = \text{Length} \times \text{Width} \] (5)

5.2 Asange plans to increase the height of the wall behind her house by 2,5 m because of burglaries. The standard size of the brick to be used is 230 mm by 110 mm by 76 mm.

5.2.1 Calculate the height of the brick and cement if cement of 12 mm thickness is used around the bricks when laying them. (2)

5.2.2 Determine the number of rows (layers) of bricks needed to increase the height of the wall, if the bricks are lengthwise along the wall. (3)
5.2.3 Calculate the volume of the standard size brick in cm$^3$

You may use the formula:

\[ \text{Volume} = \text{Length} \times \text{Width} \times \text{Height} \] (4)

5.3 Asange plans to go and watch a movie with his friends at Ecstasy cinema in his town. Study the Ecstasy cinema seating plan below and answer the questions that follow.

5.3.1 Asange holds a ticket numbered K4 and enters the cinema using entrance 2. Assist Asange to find his seat. (2)

5.3.2 In which general direction does seat J5 face? (2)

5.3.3 Allocate seat numbers for the seats that are not available on the front row at the centre of the cinema. (3)

5.3.4 Write down the total number of available seats on the north-eastern side of the screen. (2)

5.3.5 James gets into the cinema through entrance 1. He goes down the passage, enters the second front row on his left and takes the second last seat. Write down James’ seat number. (2) [36]
ANNEXURE A

Question 4.1

MAP OF VICTORIA & ALFRED WATERFRONT
ANNEXURE B

Question 4.2

BASIC FLOOR PLAN OF THE RENTAL APARTMENT
Outside wall measurements are in mm
ANNEXURE C

Question 4.3

Packing box

Rogue box
Question 1

1.1.1 The increase in cost price of the thermometer from 2019 to 2020. ✓✓ (2)

1.1.2 Difference in cost price:
R565 – R500 ✓
= R65 ✓
(2)

1.1.3 Selling price of infrared thermometer:
R565 × \( \frac{140}{100} \)
= R791 ✓
(2)

1.2.1 20 May 2020 ✓✓

1.2.2 R22,222255 ✓✓

1.2.3 Japanese Yen ✓✓

1.3.1 Netflix ✓✓

1.3.2 % subscribers to Iflix:
100% – (44 + 4 + 20 + 21 + 10)% ✓
= 100% – 99%
= 1% ✓

1.3.3 Netflix, Showmax, iRoko, Others, Amazon Prime, iFlix ✓✓

1.3.4 Horizontal Bar graph ✓✓

Question 2

2.1.1 Transaction fee is the fee that the bank charges their customers for their service ✓✓ (2)

2.1.2 R4 452,96 – A = R3 800,96 ✓
R4 452,96 – R3 800,96 = A ✓
A = R652 ✓
(3)

2.1.3 Solly’s monthly net salary
= R17 675,90 ✓
Solly’s Annual net salary
= R17 675,90 × 12 ✓
= R212 110,80 ✓
(3)

2.1.4 It is a credit. ✓ Because the money belongs to Solly ✓

2.1.5 Money spent on calls
= R289,32 – R85,00 ✓
= R204,32 ✓
(2)

2.1.6 Annual interest rate on R19 890,07 is 1,8% ✓
Monthly interest rate on R19 890,07
= \frac{1,8%}{12} ✓
= 0,15% ✓
(2)

2.1.7 Transaction fee = R2,50 + 0.95% of the amount deposited
= R2,50 + 0.95% of R325,00 ✓
= R2,50 + (0.0095 × R325,00)
= R2,50 + R3,0875 ✓
= R5,5875
= R5,59 ✓
(3)

2.1.8 Total transaction fees = R1,50 + R6,00 + R6,00 + R6,00 + R6,00 + R5,59 + R8,20 ✓
= R45, 29 ✓✓
(3)

2.2.1 A home loan is the money given by the bank to help one in buying a house or property. ✓✓
(2)
Question 3

3.1.1 Medical aid credits
= \((R310 + R310 + R209) \times 12\)
= \(R829 \times 12\)
= \(R9\ 948\)

3.1.2 Annual taxable income
= \((R44\ 690 - R2\ 687) \times 12\)
= \(42\ 003 \times 12\)
= \(R504\ 036\)

3.1.3 Tax
= \(R100\ 263 + 36\% \times (R504\ 036 - R423\ 300)\)
= \(R100\ 263 + 0.36 \times 80\ 736\)
= \(R129\ 327,96\)

Tax Rebate:
= \(R129\ 327,96 - R14\ 067\)
= \(R115\ 260,96\)

Medical credits:
= \(R115\ 260,96 - R9\ 948\)
= \(R105\ 312,96\)

Monthly tax contribution
= \(R105\ 312,96 \div 12\)
= \(R8\ 776,08\)

3.2 Singles: Income
= \(102 \times R100 = R10\ 200\)

Couples: Discount = 10\% of R200 = R20

Couples income= \(86 \times R180 = R15\ 480\)

Total = \(R10\ 200 + R15\ 480 = R25\ 680\)

Yes, they have reached the budgeted amount.

3.3 2021 Ticket price:
= \$455 \times (1,037) OR \(3,7 \div 100 \times 455\)
= 16,835

= \$471,835 \times 1,028\approx \$485,05\)

2022 Ticket price:
= \$471,835 \times 1,028\approx \$485,05\)

[43]
3.4.1 Company A:
R799,90 + (R423,65 × 30) + R69,00 + R633,32 + R637,50 = R14 849,22
Company B:
R760 + (R370 × 36) + R1 599 = R15 679,00
Difference = R15 679 – R14 849,22
= R829,78
(5)

3.4.2 Interest May:
Arrears + Interest = R185,00 × 130
= R240,50
Interest June:
Principal = R185,00 + R240,50
= R425,50
Arrears + Interest = R425,50 × 130
= R553,15
Total Instalment due for July:
Instalment July = R370,00
Interest + Arrear instalments = R553,15
Total instalment = R923,15
(5)

4.1 Range = 4 546 000 – 325 000
= 4 221 000
(3)

4.2

<table>
<thead>
<tr>

Median : Limpopo
(2)

4.3 Western Cape (WC):
Number of households with internet
= 25,7 × 1 823 (thousands)
= 468,511 (thousands) or 468 511 households
Gauteng (GP):
Number of households with internet
= 16 500 × 4 709 (thousands)
= 77 698 500 (thousands) or 776 985 households
Not Valid
(6)

4.4 a) 2017 IQR:

\[ Q_1 = \frac{(882 + 1 172)}{2} = 1 027 \]
\[ Q_2 = \frac{(1 823 + 2 827)}{2} = 2 325 \]
IQR = Q_3 – Q_1
= 2 325 – 1 027
= 1 298
2018 IQR = 1 335,5
Comparison: IQR of 2017 is smaller than the IQR of 2018
(5)

b) Gauteng (GP). GP has 1 979 000 (nearly 2 million) more households than KZN who is the closest province to GP in terms of the number of households.
(3)

4.5 P(No internet access in home)
= 100 – 10,6
= 89,4%

**Question 3**

3.1.1 Capacity is the maximum amount of liquid a container/shape can contain, usually measured in millilitres/litres etc. ✓ ✓

(2)

3.1.2 0,35 litres \(\times\) 1 000 ✓

\(=\) 350 millilitres ✓

(2)

3.1.3 Length = 55 mm
Width (A) = 55 mm ✓ ✓

(2)

3.1.4 Length and width are the same (square base):

\[
\begin{align*}
55 \text{ mm} & \div 10 \\
= & 5,5 \text{ cm} \\
\end{align*}
\]

Height:

\[
\begin{align*}
125 \text{ mm} & \div 10 \\
= & 12,5 \text{ cm} \\
\end{align*}
\]

Volume = length \(\times\) width \(\times\) height

\[
\begin{align*}
= & 5,5 \times 5,5 \times 12,5 \\
= & 378,125 \text{ cm}^3 ✓
\end{align*}
\]

(4)

3.1.5 Surface area

\[
\begin{align*}
= & 2(\text{width} \times \text{height}) + 2(\text{length} \times \text{height}) \\
= & 2(55 \text{ cm} \times 12,5 \text{ cm}) + 2(12,5 \text{ cm} \times 55 \text{ cm}) ✓
\end{align*}
\]

\[
\begin{align*}
= & 2(687,5 \text{ cm}^2) + 2(687,5 \text{ cm}^2) ✓
\end{align*}
\]

\[
\begin{align*}
= & 1375 \text{ cm}^2 + 1375 \text{ cm}^2 \\
= & 2750 \text{ cm}^2 ✓
\end{align*}
\]

(3)

3.2.1 500 g ✓ ✓

(2)

3.2.2 Self-raising flour

\[
\begin{align*}
1,5 \text{ kg} & \times 1 000 ✓
\end{align*}
\]

\[
\begin{align*}
= & 1500 \text{ g ✓}
\end{align*}
\]

(2)

3.2.3 \[
\begin{align*}
\frac{50}{25} & = 2 \text{ times ✓}
\end{align*}
\]

(2)

3.2.4 15:35 – 40 minutes ✓

\[
\begin{align*}
= & 14:55 ✓
\end{align*}
\]

(2)

3.2.5 Temperature (in F)

\[
\begin{align*}
= & \text{temperature (in C)} \times 1,8 + 32 \\
= & 180 \text{ °C} \times 1,8 + 32 ✓
\end{align*}
\]

\[
\begin{align*}
= & 356 \text{ °F ✓}
\end{align*}
\]

(2)

(23)

**Question 4**

4.1.1 Bar Scale ✓ ✓

(2)

4.1.2 Helicopter flight ✓ ✓

(2)

4.1.3 IMAX theatre ✓ ✓

(2)

4.1.4 speed = \(\frac{\text{distance}}{\text{time}}\)

\[
\begin{align*}
\text{Time} & = 17 \text{ h 23 min} = 17,38 \text{ h ✓}
\end{align*}
\]

\[
\begin{align*}
\text{speed} & = \frac{1 636}{17,38} ✓
\end{align*}
\]

\[
\begin{align*}
= & 94,13 \text{ km/h ✓}
\end{align*}
\]

\[
\begin{align*}
\approx & 94 \text{ km/h ✓}
\end{align*}
\]

(4)

4.2.1 5 ✓ ✓

(2)

4.2.2 Length of one bedroom = \(\frac{7700}{2}\) ✓

\[
\begin{align*}
= & 3850 \text{ mm}
\end{align*}
\]

\[
\begin{align*}
= & 3,85 \text{ m ✓}
\end{align*}
\]

(2)

4.2.3 SW ✓ ✓

(2)

4.2.4 Sink/Basin ✓ ✓

(2)

4.3.1 13,86 m\(^3\) ✓ = 5,5 m \(\times\) 0,9 m \(\times\) h ✓

\[
\begin{align*}
h & = 13,86 \div 4,95 ✓
\end{align*}
\]

\[
\begin{align*}
h & = 2,8 \text{ m ✓}
\end{align*}
\]

(4)

4.3.2 Option 1:

\[
\begin{align*}
\frac{5,5}{0,2} & = 27,5 \approx 27 \text{ boxes ✓}
\end{align*}
\]

\[
\begin{align*}
\frac{0,9}{0,5} & = 1,8 \approx 1 \text{ box ✓}
\end{align*}
\]

Total no. of boxes = 1 \(\times\) 27

\[
\begin{align*}
= & 27 \text{ boxes ✓}
\end{align*}
\]

Option 2:

\[
\begin{align*}
\frac{5,5}{0,5} & = 11 \approx \text{ boxes ✓}
\end{align*}
\]

\[
\begin{align*}
\frac{0,9}{0,2} & = 4,5 \approx 4 \text{ boxes ✓}
\end{align*}
\]

Total no. of boxes = 11 \(\times\) 4

\[
\begin{align*}
= & 44 \text{ boxes ✓}
\end{align*}
\]

Invalid ✓

Option 2 will have more boxes ✓
Mathematical Literacy Grade 12

Trial Examination Paper 2 Memorandum

4.3.3  a) Surface area = $2(1,2 \times 1,6) + 2(0,4 \times 1,6)$

$= 3,84 \text{ m}^2 + 1,28 \text{ m}^2$

$= 5,12 \text{ m}^2$

Total Surface area (Triple layer)

$= 5,12 \text{ m}^2 \times 3$

$= 15,36 \text{ m}^2$

b) Perimeter = $2(1,2 \text{ m} + 0,4 \text{ m})$

$= 3,2 \text{ m} \times 3$

$= 0,6 \text{ m} \times 100$

$= 960 \text{ cm}$

Question 5

5.1.1 Length = $4 880 \text{ mm} ÷ 1 000$

$= 4,88 \text{ m}$

5.1.2 Distance A = $3 (150 \text{ mm})$

$= 450 \text{ mm}$

5.1.3 Height of the wall

$= 2,1 \text{ m} + (450 \text{ mm} ÷ 1 000)$

$= 2,1 \text{ m} + 0,45 \text{ m}$

$= 2,55 \text{ m}$

5.1.4 Area = Length Width

$= \frac{4,88}{2} \times 2,1 \text{ m}$

$= 5,124 \text{ m}^2$

5.1.5 Area covered by bricks

= Area of garage – Area of double door

$= (2,55 \text{ m} \times 5,18 \text{ m}) – (4,88 \text{ m} \times 2,1 \text{ m})$

$= 13,209 \text{ m}^2 – 10,248 \text{ m}^2$

$= 2,961 \text{ m}^2$

5.2.1 Height of the bricks and cement

$= (12 \times 2) + 76 \text{ mm}$

$= 100 \text{ mm}$

5.2.2 Number of rows of brick = $\frac{2500}{100}$

$= 25$

5.2.3 Volume = $23 \text{ cm} \times 11 \text{ cm} \times 7,6 \text{ cm}$

$= 1 922,8 \text{ cm}^3$

5.3.1 There is no seat for Lundi here

Pearson South Africa

At Pearson, home of Maskew Miller Longman and Heinemann, we’re here to help people make progress in their lives through learning.

We work with teachers and learners to create and continually improve our wide range of products and services. We create content in all 11 official languages for learners from pre-school to Grade 12. Whether it’s our trusted CAPS-approved textbooks, digital and supplementary resources, or professional development courses, we put the learner at the heart of everything we do.

Every day all over South Africa, our products and services help learning flourish – because wherever learning flourishes, so do people.
